

VPAT™

Voluntary Product Accessibility Template®

Version 1.3

The purpose of the **Voluntary Product Accessibility Template**, or **VPAT™**, is to assist Federal contracting officials and other buyers in making preliminary assessments regarding the availability of commercial “Electronic and Information Technology” products and services with features that support accessibility. It is assumed and recommended that offerers will provide additional contact information to facilitate more detailed inquiries.

The first table of the Template provides a summary view of the Section 508 Standards. The subsequent tables provide more detailed views of each subsection. There are three columns in each table. Column one of the Summary Table describes the subsections of subparts B and C of the Standards. The second column describes the supporting features of the product or refers you to the corresponding detailed table, e.g., “equivalent facilitation.” The third column contains any additional remarks and explanations regarding the product. In the subsequent tables, the first column contains the lettered paragraphs of the subsections. The second column describes the supporting features of the product with regard to that paragraph. The third column contains any additional remarks and explanations regarding the product.

Date: 2/29/16

**Section 1194.22 Web-based Internet
information and applications – Detail**

VPAT™

Voluntary Product Accessibility Template®

<i>Criteria</i>	Supporting Features	Remarks and explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Not supported	Images and CSS images are missing alternative text.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Not applicable	There is no multimedia content.
(c) Web pages shall be designed so that all information conveyed with	Supports	Information conveyed with

color is also available without color, for example from context or markup.		color is also available in text.
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Supports with exceptions	Some buttons and links with graphical icons and tooltips generated via CSS are no longer visible when it's disabled.
(e) Redundant text links shall be provided for each active region of a server-side image map.	Not applicable	There are no server-side image maps.
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	Not applicable	There are no server-side image maps.
(g) Row and column headers shall be identified for data tables.	Supports with exceptions	Column headers are provided but row headers are missing for data tables.
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Not supported	Complex data tables do not have complete header cell associations.
(i) Frames shall be titled with text that facilitates frame identification and navigation	Not applicable	There are no frames present.
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Supported	Pages don't cause flickering.
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be	Not applicable	There is no text-only page provided.

<p>accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.</p>		
<p>(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.</p>	<p>Not supported</p>	<p>Menus, date pickers, close buttons, and other controls are not keyboard operable.</p>
<p>(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).</p>	<p>Not applicable</p>	<p>Pages do not use applets or plug-ins.</p>
<p>(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.</p>	<p>Supports with exceptions</p>	<p>Error messages are not associated with their invalid inputs. Errors are not spoken to the screen reader user. Invalid inputs are not indicated to AT.</p>
<p>(o) A method shall be provided that permits users to skip repetitive navigation links.</p>	<p>Not supported</p>	<p>There is no keyboard accessible skip link.</p>
<p>(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.</p>	<p>Not supported</p>	<p>Screen reader users are not alerted to the session timeout and not given sufficient time to indicate more time is required.</p>

Note to 1194.22: The Board interprets paragraphs (a) through (k) of this section as consistent with the following priority 1 Checkpoints of the Web Content Accessibility Guidelines 1.0 (WCAG 1.0) (May 5 1999) published by the Web Accessibility Initiative of the World Wide Web Consortium: Paragraph (a) - 1.1, (b) - 1.4, (c) - 2.1, (d) - 6.1, (e) - 1.2, (f) - 9.1, (g) - 5.1, (h) - 5.2, (i) - 12.1, (j) - 7.1, (k) - 11.4.
